ECONOX
PREFABRICATED BUILDINGS
THE FAST SOLUTION

The prefabricated Econox building is composed of wall panels and a pre-assembled roof, either insulated or non-insulated, which can be erected on simple foundations, by a small crew and a light crane. This construction system allows you to erect, expand or relocate buildings in only a few hours and provides substantial savings.

Ideal for companies in the mining, hydroelectric, energy and forestry industries or for large construction projects, the Econox system offers a logical solution for rapid deployment requirements or relocation needs without compromising quality, especially in remote locations. Econox buildings are known for their sturdiness and continuous airtightness even after several relocations.

A 2,400 SQ. FT. BUILDING CAN BE INSTALLED IN 48 HOURS.

THE CUSTOM SOLUTION

The Econox prefabricated building system can be designed to comply with various building codes. Canam can also take care of the foundation design. All building plans are sealed by professional engineers. Our technical team responds to the specific needs of each project and provides continual support throughout construction.

Several options are available. Please talk to your representative:

- Insulation up to R-40
- Choice of personnel doors and windows
- Metal cladding available in several colours and finishes
- Skylights and canopies available
- Shipping options for maritime, railway and other transportation needs.
- Installation on non-traditional foundations

STANDARD PROJECT

40' x 60' x 18' - HIGH
A SIMPLE SOLUTION

Wall panels and a pre-assembled roof:
- Large clear spans
- Relocation in a few hours
- Requires only light-weight assembly equipment
- Simple and economical foundations
- Factory-installed personnel doors and windows

Step-by-step installation
From delivery to installation and finishing: all in record time.

TECHNICAL INFORMATION

Standard finish
Exterior and interior walls, and roof: metal cladding, zinc coated sheet steel with silicone modified polyester (SMP) topcoat.

Technical limitations
Width “A”: 20 ft to 80 ft
Height “B”: 10 ft to 40 ft
Length: Unlimited
Clear spans greater than 80 ft can be accommodated in a hybrid configuration.

ECONOX EXPRESS

These configurations are available in stock.
